How Your Support Makes a Difference

Each year, less than 20% of the 1+ million children and youth with mental health issues in Canada receive timely and appropriate treatment. With increasing demand for services, children's mental health agencies are struggling to keep up. But it doesn't need to be this way...

Capitalize for Kids is a charity driving innovation in community child and youth mental health. Our impact team works closely with community mental health agencies to identify gaps, remove barriers, and expand service capacity, so more kids get the help they need. In 2025, we worked with more than 50 agencies to help over 200,000 children and youth access timely, appropriate mental health care.
